Create embroideries of unlimited size with easy rehooping!

Use the "Orbit to precise position" function to check the position of your design on the fabric. This is a wonderful advantage when you want to embroider several designs in a row. You can be confident that each design is placed exactly. This makes it easy to create embroideries of unlimited size!

Move through the entire design, stitch by stitch!

You can move through the entire design, stitch by stitch, or color by color! This makes it possible to embroider only selected segments or colors of the design.

The **basting function** prevents knil fabrics from stretching and fastens fabrics that you don't want to hoop. It is also used to attach small fabric pieces to hooped stabilizers or fabric.

Fantastic! Arcing of texts, alphabets, and decorative stitches – straight, S-curved or circular!

Embroider words, entire sentences or decorative stitches in straight or S-curved lines, in a circle or in several rows. Left, right or center-justified – whatever the multi-color touch screen shows is what Pfaff's creative²¹⁴⁴ creates.

Even more embroidery convenience:

The bobbin monitor warns you when the bobbin thread is running low.

Convenient bobbin winding, without having to remove the hoop, even while you are sewing or embroidering – thanks to a separate motor! Easily cut off the thread with the conveniently placed thread cutter.
